If you have dropped your next track in but it's not quite in time, by pressing sync you can perform an automatic beat sync. Beat sync works by snapping the two closest transients together and matching the BPM. You can click the OFF button to the left of the Sync button to turn sync off (or press shift + SYNC on your Serato DJ hardware).

SYNC with Serato DJ - Serato Support

An automatic watch can be expensive. Many luxury watch brands offer a wide range of automatic watches that are meant to be investment pieces. Automatic watches retain their value because they are well-made and interesting. A number of entry- and mid-level brands offer well-engineered automatics in a wide range of prices.

Must Know FAQs About Automatic Watches - Overstock.com

An automatic watch, also known as self-winding watch or simply automatic, is a mechanical watch in which the natural motion of the wearer provides energy to wind the mainspring, making manual winding unnecessary. It is distinguished from a manual watch in that a manual watch, likewise having no internal battery, must have its mainspring wound by hand at regular intervals.
