One of the features that you'll see used to sell digital cameras is how many megapixels a digital camera has. When I first got into digital photography, a few years back, the megapixel rating of cameras was actually quite important as most cameras were at the lower end of today's modern day range and even a 1 megapixel increase was significant.

The camera is actually looking at a smaller number of pixels than the output resolution.

For example, a camera with a UHD 4K image sensor may have an active sensor

resolution of 3840 x 2160 pixels. However, if you use a 4X Digital Zoom, your active image area will then only be 1920 x 1080.
