If they'd asked me to solve $3 = 2b$ for b , I'd have divided both sides by 2 in order to isolate (that is, in order to get by itself, or solve for) the variable b . I'd end up with the variable b being equal to a fractional number.. In this case, I won't be able to get a simple numerical value for my answer, but I can proceed in the same way, using the same step for the same reason (namely, that ...
