Principles of Neural Science (Principles of Neural Science ...

Neuroscience (or neurobiology) is the scientific study of the nervous system. It is a multidisciplinary science that combines physiology, anatomy, molecular biology, developmental biology, cytology, computer science and mathematical modeling to understand the fundamental and emergent properties of neurons and neural circuits. The understanding of the biological basis of learning, memory ...

Medium spiny neurons (MSNs), also known as spiny projection neurons (SPNs), are a special type of GABAergic inhibitory cell representing 95% of neurons within the human striatum, a basal ganglia structure. Medium spiny neurons have two primary phenotypes (characteristic types): D1-type MSNs of the direct pathway and D2-type MSNs of the indirect pathway. Most striatal MSNs contain only D1-type ...

Il cervello umano adulto pesa in media circa tra gli 1,2 e gli 1,4 kg così da rappresentare circa il 2% del peso totale corporeo. Occupa un volume di circa 1260 cm³ negli uomini e di 1130 cm³ nelle donne, sebbene ci sia una sostanziale variazione tra individuo ed individuo. Le differenze neurologiche tra i sessi non hanno dimostrato di essere correlate in alcun modo a differenze di ...

Cervello (anatomia umana) - Wikipedia

Neural development is one of the earliest systems to begin and the last to be completed after birth. This development generates the most complex structure within the embryo and the long time period of development means in utero insult during pregnancy may have consequences to development of the nervous system.
