While it seems that the geological event described did take place, there are a number of assumptions which make identification with Noah's Flood doubtful or impossible in the form suggested. After all, one must account for the global memory of a great flood, as well as integrate the theory with other scientific disciplines, and the Biblical data.

### Archaeologist claims evidence of Noah's biblical flood ...

Noah's Flood Was Global. The flood was not localized in the Mesopotamian valley, as many Christians believe, but was global in extent. When the waters reached the highest, there was no land above sea level anywhere on the planet. Only a global flood would cover all the high mountains under the heavens by at least 15 cubits (about 25 feet or 7 meters: Genesis 7:19).
