In ediscovery, OCR is used to convert image- or paper-based discovery into computer-based text. When discoverable materials are received as images such as TIFF files, software with OCR can identify any letters, numbers, or other text characters. It then converts those characters from pixel-based pictures into readable text.

Optical Character Recognition (OCR): Converting Paper ...

This paper examines whether the ocean ambient noise floor may have been significantly higher in 1800 than in the 1958 baseline year of the "Ross Prediction," suggesting that ambient noise levels may be less of a biological aggravator than the particular characteristics of a noise source.
