As briefly mentioned in Section 1.17, “Alternative Front-Ends”, VBoxManage is the command-line interface to Oracle VM VirtualBox. With it, you can completely control Oracle VM VirtualBox from the command line of your host operating system. VBoxManage supports all the features that the graphical user interface gives you access to, but it supports a lot more than that.

### 8.1. Introduction - Oracle VM VirtualBox

I needed to do this for internal use. I really hope you are not letting users outside your company use your app since you have opened it up to man in the middle attack and they would then be vulnerable to someone hijacking their session. nonetheless, I need to do this temporary for some testing until I get the real certificate in hand.....hopefully you are doing it for the same temporary kind ...

Wi-Fi Direct (also known as peer-to-peer or P2P) allows your application to quickly find and interact with nearby devices, at a range beyond the capabilities of Bluetooth.. The Wi-Fi peer-to-peer (P2P) APIs allow applications to connect to nearby devices without needing to connect to a network or hotspot.

### Create P2P connections with Wi-Fi Direct | Android Developers

This is a mod of the Spotify Lite v0.6.6.The official Spotify app for Wear OS is not able to stream music standalone. Sideloadng any Spotify works but the UI is obviously giant on Wear OS - see this recent Spotify screenshot from Wear OS. It's possible to change system wide density but it takes away the usability and look of Wear OS.
