"A radio button or option button is a graphical control element that allows the user to choose only one of a predefined set of mutually exclusive options. The singular property of a radio button makes it distinct from a checkbox, which allows more than one (or no) item to be selected and for the unselected state to be restored."

How to Insert and Use a Radio Button (Option Button) in Excel

Create a bound check box, option button, or toggle button. Create an unbound check box, option button, or toggle button. Understand option groups. Create an option group. Add a new option to an existing option group. Decide which control to use. For most situations, a check box is the best control for representing a Yes/No value.
